

About

I'm a software engineer who is one of the fortunate few who loves what I do. There is nothing that satisfies me more than creating unique solutions for everyday business needs. There is something hypnotic about turning boring, plain old text, into something of functional value. When not saving the world with my programming abilities; I enjoy hiking with my wife and kids, and rock climbing with friends.

Experience

Application Engineer III (2009 – Current)
Golden Living in Fort Smith, AR

Senior Software Developer from 2007 to 2009
QED Transcription Services in Bentonville, AR
